## training

## An Introduction to Badger Ecology and Management 2011 course dates

This one day course is aimed at those who deal with badger management issues in relation to development, planning, damage mitigation or conservation.

Highly experienced tutors will provide a comprehensive introduction to badger ecology and management.

A morning of instruction in the classroom will be followed by an afternoon in the field putting theory into practice.

### Course content includes:

- Basic Biology
- Habitat Preferences
- Feeding Behaviour
- Reproduction
- Legislation & Licences
- Problems & Mitigation
- Interpretation of Field Signs
- Sett Surveys
- Latrines & Bait Marking
- Monitoring.

### Location

Near Stroud,  
Gloucestershire

### Dates

March 14th &  
September 12th

### Cost

£165.00 per person  
(includes buffet lunch)
